

OBRYCKI

L O F T M A N U F A K T U R

We realize your creative project, with our primary competence being in the development and implementation of liquid plastic coatings.

Since we are independent and not working for only one manufacturer of synthetics, we can flexibly adjust to any requirements and always offer you the best system.

In addition to the design and application of individual, seamless flooring systems, we are experienced in coating walls and furniture.

Through cooperation with leading manufacturers of synthetic systems, we are always „up to date“ and make our designs permanently unique through daily development and innovation.

individual home design

design:

- choose from our wide variety of styles and about 20000 colors
- corporate design elements (like company colors and logos) can be implemented
- every handmade floor is unique in design
- choose from different sealers: matt, satin, glossy, high gloss lacquer
- your creativity has no set bounds

care:

- easy to clean because the surface is seamless and has no pores
- resistant against various chemicals such as: hydrogen peroxid, softening agents, etc.
- can be refreshed or redesigned (other color/s etc.) in short time (about 24h)

technology:

- can be used on all kinds of floor, parquet, (glazed) tiles, carpet, metal, etc.
- seamless
- can be applied over gaps
- hardness and skid-resistant features are adjustable
- suitable for floor heating
- can be applied reversibly
